Mel File No 139 of 1926

Serial No

1 The Dte Chitaldrug No A6 c 2806 dt 20 1/27 Reports that the Davangere Mel Cl have accepted the tender of Mr H Subbarao for execution of the Davangere Drainage project and requests that instructions may be issued to the Comptr to pass the bills in regard to this project in accordance with Comptr Circular No 172—189/HHD dt 6 8/23 Four Petns protesting against the acceptance of Mr Subbarao's tender for the Mel Cl

1) Subt the project was sanctioned in Go No L 2048—50/Mel 146—24—28 dt 9 25 and the Chief Engr was requested to take up the work, the Govt Contributing a sum not exceeding Rs 10000 a year for five years

A

2) Subsequently in Go No L 4582—4/Mel 116 dt 21 12 25 the Mel Cl was permitted to get the work done by its own Engineering staff—

3) Accordingly the Mel Cl have the tender of Mr H Subbarao for executing the work at a cost of Rs 78843/— and now request that Rs 8000/— being the 1st year's Govt grant may be placed at their disposal

4) The Dte has informed the Mel Cl that no formal placing of the Govt share of Contribution at the disposal of the Mel Cl is necessary & that action in accordance with Comptr Circular [illegible]

taken - Thos marshe Dme

5) The following petitions also have been received for consideration

1 Petn addressed to Secy L Govt Dept Complaining that the project was defective in some respects as it stood was likely to be of use to the town & that the Contract has been given to Mr Subbadeo without any regard for Mr Jones as the tender accepted by the Cl is Rs 3000/- less than the rejected tender of Messrs Gavarappa Sons & approved Contractors.

A Similar petn dd 10/2/27 has been received from Messrs Gavarappa & Sons -

The estimate has been scrutinised by the P W D and the Chief Engineer has reported that the scheme represents the minimum requirements necessary to place the drainage of the town on a satisfactory basis'

Feby 6

6) The Mr Cl may if necessary be asked to explain why the tender of Mr Subbadeo was accepted in preference to other tenders resulting as alleged in a loss of Rs 3000/- 7) The Govt Ch Engr found always to accept the lowest tender as in this case Govt may be moved to do so in this matter Art 276 of the Govt Test Manual & Orders of the Govt [illegible]

Board calling for tenders is perhaps
In Clause 6 it is stated that the final
acceptance of any tender will rest with
the Board who do not bind themselves
to accept the lowest or any tender or
to assign any reason whatever for
the rejection of any tender.

3) The several tenders were considered
by the Board and the Subbaraoo's
tender was accepted by a majority
though this was more than the amount
tendered by the next lowest by Rs 3000/- The
reasons is also stated in the resolution
1) first may not interfere perhaps
with regard to the Contractor order, the
though it may not be proper
for the Council to increase the cost.
but for order

(illegible)

15/2

16) The reason given by the Municipality
of this can be considered to have given any reason
at all - for accepting the Subbaraoo tender
though it exceeds the next lowest tender by Rs 3000
is that the Subbaraoo is likely to do good
and satisfactory work since he possesses
technical knowledge necessary for the work
and has executed various works satisfactorily
This argument may possibly prevail as
against the other tenderers about

Mr 139 26 — 1

Sir,

With reference to Government order No L 2048-50/11 146-24-2 dated 14th September 1925 sanctioning the drainage project of the Davangere town, I have the honor to state that the Davangere Municipal Council have accepted the tender for Rs 76743 from Mr H Subba Rao for the execution of the work and requested that a sum of Rs 8000 being the last instalment of the Government share of the cost of the work sanctioned in the above order may be arranged to be placed at their disposal The President of the Council has this day been informed that no formal placing of the Government share of the work at the disposal of the Municipality is necessary and that in cases of the kind the procedure prescribed in the Comptroller's Circular No 172-189/LAD dated 4th August 1923 should be followed

I request that necessary instructions may kindly be issued to the Comptroller to pass the bills received from the President in this connection

Letter No 85 dated 17th instant and its enclosures from the President of the Municipal Council are herewith forwarded

I have the honor to

Sir, Enclosure four

With reference to Government Order No L 4582-4 Ml 116-25-2 dated 21st Dec 1925 forwarded with the Deputy Commissioner Memo No D2 Dis 45 Ml 25-26 dated 31st December 1925 and in continuation of this Office No 72 dated 22 3/2/1926 regarding the execution of the Drainage Scheme of this Municipality, I have the honor to state that tenders were called for by the Municipal Council by means of publication of the notice in the Gazette as resolved in their meeting held on 23-7-1926 copy of which is enclosed for ready reference.

Within the time fixed for receiving tenders Viz 1st October 1926, 3 tenders by Messrs H Subba Rao, Gaviappa, and Iyengab were received and they were scrutinized by a special Committee appointed for the purpose The comparative statement submitted by them were fully discussed at the meeting of the Council held on the 18th November 1926 and it was resolved the tender of [illegible]

from Mr H Subba Rao may be accepted although the total amount of his tender was more than that of the other two inasmuch as he was likely to do good work and satisfactory work since he possess the technical knowledge necessary for the work and had executed various works -- -- satisfacterily Copies of the comparative statement and the resolution of the Council accepting the tender of Mr H Subba Rao are also enclosed for ready reference

I therefore request you to be so good as to move Government to kindly place Rs 8000/- being the first instalment of their contribution towards this work as the Municipal Council intend taking up the work immediately and finish the first year's allottment by the end of June next

I have the honor to be,

sir,

your most obedient servant,

Subject No XI Disposal of tenders received for Drainage Schem

Resolution The estimated value of the work is Rs 77,269/- for this three tenders have been received as follows -

1 Mr Miya Sahib Rs 73,251/-
2 Mr Gaviyappa Rs 73,834/-
3 Mr H Subba Rao Rs 76,343/-

Mr K Suryanarayana Rao proposed that taking all things consideration, the tender of Mr Gaviyappa should be accepted and he a professional contractor who has been carrying on important works the Public Works Department although his tender is a little above tha of Mr Miya Sahib This is seconded by Mr K Channabasappa

Mr Devendrappa proposed that the work should be given to Mr H Subba Rao although the total amount of the tender is more tha the other two contractors as he is likely to do good and satisfactory work since he possess technical knowledge necessary for the work and has executed various works satisfactorily He is seconded by Mr Gurusiddappa and supported by Mr Y M Doddappa

The proposition of Mr K Suryanarayana Rao was first put to vote Only two voted for it The second proposition was then put to

o -

vote. 9 voted for it. The first proposition was thus lost and the second was carried

DAVANGERE TOWN MUNICIPALITY

Notice is hereby given that sealed tenders will be received in the office of the President Davangere Municipality up to 1st October 1926 for carrying out the Drainage Scheme at Davangere Town commencing from the year 1926-27 and extending over for five years up to 1930-31

2 The approximate quantity and description of the work required to be done are given in the sub-joined statement and tenders should be sent in the form of that statement duly noting in the column left blank the rate at which each item of work will be executed. The tender should be superscribed Tender for the Drainage Scheme at Davangere in default of which tenders will be rejected

3 Earnest money of Rs 2 000 which should be in cash or currency notes or by means of cheques on the Mysore Bank Davangere should accompany the tender without which tenders will not be considered

4 The rates offered should include the cost of materials and the charges for complete construction of the said drains etc at Davangere and should hold good throughout the years 1926-27 up to end of 1930 31 No application from the contractor for any sort of con cession owing to the rise in prices of materials or any other cause will be considered

5 The plans and detailed estimates may be seen at the Office of the President Davangere Municipality between the hours of 12 NOON and 5 P M on all working days

6 The final acceptance of any tender will rest with the Municipal Council Davangere who do not bind themselves to accept the lowest or any tender or to assign any reason whatever for the rejection of any tender

7 Within eight days of the acceptance of the tender the successful competitor will be required to execute the usual contract Bond on stamped paper in default of which his tender will be considered cancelled and his earnest money will be forfeited

8 The name of the successful competitor whose tender has been accepted will be posted on the Notice Board in the President's Office in due course No enquiries regarding the acceptance or rejection of a tender will receive any reply

9 On acceptance of one of the tenders the earnest money on rejected tenders will be refunded

10 Charges on account of implements for setting out barricading clearing site supply of water etc that may be found necessary during execution will not be paid for separately but should be borne entirely by the contractor

11 Rates for non tendered and non estimated items shall be as per schedule rates of the Municipality or those fixed by the Municipal Council after working out data with not more than ten per cent for contractor's profit

12 In all matters not specially provided for and in all matters of dispute about rates quantities measurements quality of work etc and in all disputes of any kind the decision of the *Municipal Council Davangere* will be final and legally binding

13 The value of the work to be turned out each calendar month shall not be less than Rs 1 500 Progress of work will be reckoned from the date of agreement

The Chief Secretary
to the Government of Mysore,
Bangalore

W439-26-2

The undersigned Municipal Councillors of the Davangere Municipality most respectfully beg to lay before the following -

The Chief Secretary to Govt was aware that a drainage scheme for Davangere town has been sanctioned by Govt at a cost of Rs.82 Thousand and the Municipality is allowed to carry out the work.

The Council accordingly resolved to call for tenders stipulating various conditions.

During this time the undersigned Councillors objected that the scheme was defective in certain respects and as it stood was of very little use to the town. This objection was strenuously opposed by certain members who wanted to secure the contract of this big work for their own men, and the tender was called for.

Three tenders were received one from Mr. Mysore for Rs. , one from Mr. Govinda and some Govt. Contractors for Rs. , and the third one from Mr. H.Subba Rao, formerly Manager of the Mysore Bank Branch of this place Though Mr. Subba Rao's tender was Sub/- more than the Government approved Contractors Mr. Govinda and some tender, several of the members not caring to the Public money that they are going to waste have given voted in his favour for various reasons known them alone.

It is a sheer waste of Rs. 3000/- when we could secure better work for less expenditure; and we beg to state our disapproval of the conduct of the Council in a matter concerning the Public funds.

P.T.O.

We, therefore, request that the matter may be gone - thro thoroghly before approving the measures taken by the the Municipal Council in this matter.

I beg to remain,

S i r,

Your most obedient servants.

Dewan of Mysore, BANGALORE

My most respected Sir,

We beg most respectfully to bring to your benign consideration that the Drainage of Davangere Town is sanctioned for Rs 80,000/- There were three tenders for the work, the lowest tender being that of one Mr Meea Sab and ours (Gaviappa & Sons) being the second But the work is now given to one Mr Subba Rao, Commission Agent of the Mysore Bank at Davangere whose tender was the highest, as he has vast influence with the members of the Municipal Council, though he has not carried out any works His tender is Rs 4000/- more than that of the lowest To favour this gentleman the Local Fund and Government are undergoing this loss We have constructed the High School at Davangere at a cost of Rs 70000/-, Maternity Hospital at Davangere for Rs 35,000/- and anotner school for Rs 5000/- in the same place within these two years to the entire satisfaction of the officers and the Government We have already submitted a detailed petition to your honor about this 20 days ago We beg you will be pleased to make a detailed enquiry into the matter and order that the work should be given to us

For which act of kindness, we ever pray

We beg to remain,
Most Respected Sir,
Your most obedient servants,

15, instead of being the lowest, actually the highest tender and

16

by a good deal ~~by a good deal~~ that
~~the highest tender~~ of the Council have, we spoke out,
accepted has tender on the ground that
he is likely to do a satisfactory work
due to previous technical knowledge
necessary for the work and has recently
various works satisfactorily. Though
this argument may possibly prevail
against the Mija Sahib, about whom
we do not know very much, it does not
appear to hold good against Sri Sanjiva, who is also said to be a professional
contractor of carrying out important
works in the Public Works Department

Town Municipality
Davangere

I am therefore to request you to favour
us with the receipt of the Minutes of
the Meeting of the Council held on the
23rd inst. when the tender for the work
of the supply of a hipped tender
cart by the accepted by the Council
in preference to the lowest tender
also by a person who
has already executed
and it was decided that the Chairman of the
Municipality first study this document carefully
with the Council in the matter

Yours faithfully

K Chandy, Esq.,

1st Councillor,

Bangalore

Fwd 139-226-8

Respected Sir,

I, the undersigned, beg to bring the following few lines to your honour's kind consideration and requests to pass favourable orders

The Drainage works of Davangere was sanctioned by Government for Rs. 80000/- and tenders were called by the Municipality accordingly, fixing security deposit of - - Rs. 8000/- for the same.

For which three tenders were received, one Mr. H Subbarao, the late Mysore Bank Commission agent

Messrs. Caviappa and Sons, Government approved Contractor and of mine

In comparing the three tenders mine was the - lowest, that is, 4000/- less than the last tender of Mr.H. Subbarao, and 2. Messrs Caviappa and Sons and the difference is ~~six~~ 800/- more than mine.

But the members of the Council recommended - only to Mr.H Subbarao without considering of mine and - Messrs. Caviappa and Sons even though the total amount - was 4000/- less than the sanctioned amount. More over, it is not possible to put all the underhand dealings - between Councillors and President, in black and white and it can be explained in person if I am permitted to do so

If the work is entrusted to the P W D Department there will be savings not less than 20000/- wherein the Municipality or the members cannot wag their tail - before the Government

Solicits early consideration in the matter

I beg to remain,
Sir,
Your most obedient Servant,

FROM

The *Deputy Commissioner*
Chitaldrug District

To

The General Secretary to Government,
Bangalore

Sir,

With reference to your letter No 5203/ I 139-2 - dated 24th February 1927 requesting me to report to the Town Municipal Council, Davangere, the disadvantages of accepting the tender of Mr H Subba Rao in preference to the lower tender of Mr Gaviappa for the execution of the Drainage Project in the Town I have the honor to forward herewith a copy of letter No 114/26-27 dated 22nd March 1927 explaining the circumstances under which the Council recommend the acceptance of the tender of Mr H Subba Rao, though it is higher than that of Mr Gaviappa A copy of the resolution of the Municipal Council passed in the matter is also enclosed

I personally discussed the matter with the President when I last visited the Town on the 20th March 1927 and from what he told me I feel that Mr Gaviappa does not appear to me to be a satisfactory contractor The Municipal Council's decision may therefore be accepted

I have the honor to be,
Sir,
Your most obedient servant,

D. Srinivasa Iyengar
Deputy Commissioner,
Chitaldrug District

Letter No.114/26-27 dated 22nd March 1927 from the Presidel
Davangere Municipality to the Deputy Commissioner, Chitaldrug Dis

---

With reference to your memo No AS-C.2806/26-27 dated 3rd Marc
1927 forwarding copy of letter No . 5926/M1 139-26-7 dated 24th --
February 1927 from the General Secretary to the Government in the
matter of acceptance of tender of Mr H Subba Rao for executing
Drainage Project of Davangere Town, I have the honor to state that
this subject was placed before the Municipal Council in their meeti
held on the 16th instant and was fully discussed therein. All the
members of the Council were present that day and the discussion --
occupied nearly two hours. In the end, the Council resolved by a
majority that the tender of Mr H. Subba Rao should be accepted
Copy of the resolution is enclosed for kind perusal

The majority of the members are not in favor of entrusting
costly project to Mr Gaviappa on very good grounds, as thier exp
ence of this contractor is not happy. Mr Gaviappa had taken the
contract of building Toll houses and of repairing a road by the sid
of Basavannadevaru temple in this Municipality. In the first contra
he built one of the Tollhouses at a place not wanted by the Municip
Council and without consulting the ~~xxxxx~~ Municipal authorities bef
hand The work too is of a poor quality In the second case, he --
undertook to repair the road in the year 1925-26 He collected some
materials and received some payment thereon When the Public Works
Committee of the Municipal Council rejected the gravel as useless,
resented their interference and refused to supply good gravel and
complete the work inspite of several notices This contract had --
therefore to be cancelled recently and a fresh estimate prepared to
have the work done by some other contractors It is learnt that Mr
Gaviappa is going about and inducing others also not to do the work
His attitude with the Council is not satisfactory The Council there-
fore apprehends that he might not be amenable to control if he is
given this contract and therefore resolved that the acceptance of
Mr H. Subba Rao's tender be approved although it is higher than t
of Mr Gaviappa since they are of opinion that good work can be
expected from him

Subject

Memo from the Deputy Commissioner, Chitaldrug District forwarding General Secretary's letter No 5926 M1 139-26-7 dated 24-2-27 Re- Drainage Scheme Tenders

Resolution

The matter was fully and carefully reconsidered The following Municipal Councillors represented that under the terms of the notification calling for tender, a copy of which has already been submitted to Government, the full power for the acceptance of the tender is vested in the Municipal Council and in accordance with these terms

they exercised their discretion and accepted the tender of Mr H Subba Rao for the reasons already given in the resolution accepting the tender However as Government have been pleased to send back the record for fresh decision it has to be pointed out that in view of the fact that Mr Gaviappa, who took the contract for building Toll gate houses and also to repair the road by the side of Basavannadevara gudi in the Municipality, not only failed to complete the works but also resented the interference of the Municipal Council They therefore apprehend that this Contractor might not be amenable to control if such an important drainage work for the execution of which the Municipal Council is ordered to be responsible is entrusted to him -

Messrs Mr T Devendrappa, 2 Gowramiya Sahib, 3. Doddappa, 4 Ramalingappa, 5 Narayana Chetty, 6 Gurusiddapa, 7 Chandrasekhariah, 8 H Mahadevappa, 9 P S Purmaiya

Messrs, Suryanarayana Rao, Thakkappa, and Channabasappa said that the tender of Mr Gaviappa which is less than the other one by Rs 3000/- should be accepted

Mr Shanta Veeriah said that in view of the fact that Mr Subba Rao's tender is high and Mr. Gaviappa s work in the Municipality is not found to be satisfactory, both these tenders be rejected and fresh tenders called for from others

Messrs Murigappa, Onkarappa, and B Khasim Sahib refrained from giving any opinion

It was therefore resolved by the majority that the decision of the Council is still in favour of accepting the tender of Mr H Subba Rao.

" C O P Y "

PRESIDENT 27/8/47

Davangere Municipality

GOVERNMENT OF HIS HIGHNESS THE MAHARAJA OF MYSORE

General and Revenue Secretariat

Dated Bangalore 3rd February 1927

No 6019/GRM39-26-11

From

N MADHAVA RAO Esq B A B L
Chief Secretary to the Government of His Highness the Maharaja of Mysore

To

M. Rhodes, Esq., A.M.I.C.E., Etc.,
Chief Engineer of Mysore, Bangalore.

Sir

With reference to Government Order No.L.4582-4/M1.116-25-8 dated 21st December 1925, directing that the drainage scheme of the Davangere Municipality may be executed by the Municipality with its own Engg. officers, I am directed to state that it is reported that tenders were called for by the Municipal Council and the tender of one Mr H. Subba Rao for Rs 76,343/- was accepted by the Municipal Council although there were other tenderers who offered lower rates.

I am in this connection to invite your attention to the note of inspection of the Davangere Town by Mr. Napier and to request you to favour Government with your suggestions on his remarks as to the stages in which the Drainage project work should be undertaken; whether detailed plan and estimate for each stage is not necessary and whether fresh tender should not be called for after detailed plan and estimate are sanctioned (whether for each stage separately or altogether) and finally whether the work could safely be supervised by the Local Works Engineer or how you would propose supervising the work during construction so as to make it really efficient.

An early reply is requested.

I have the honour to be,
Sir,
Your most obedient servant,

Dair 3/2

For Chief Secretary to Government.

Mr 7/5

M 139-26-12

With reference to your No L 8019/M1 139-26-11 dated the 3rd May 1927, requesting me to favour Government with my suggestions on the Drainage Scheme of the Davangere Municipality, I have the honour to state that from Mr Marker's inspection note on the drainage scheme, it is evident that the sanctioned estimate requires revision, and the --- drainage works must be taken up in various stages, and as each stage will take some years to complete, the duration of which will depend - on the yearly grant, it is not advisable to call for tenders for the whole work, but to call for fresh tenders for each stage of the work-

2 The first stage will be the construction of the three main - drains mentioned in the inspection note This may be taken up at -- once, after detailed estimates have been prepared and sanction ------ obtained thereto-

3 There is no objection to the Municipality in carrying out -- the drainage works with their own ~~estimate~~ Establishment— provided they have an ---- officer who is conversant with such works As far as my information

goes, they have at present no officer or subordinate who can be entrusted with this work I would therefore suggest that the services of a good drainage Overseer be engaged by the Municipality; and for this work I could recommend no better Overseer than Mr D Mallappa who was compulsorily retired at the age of 50 in the retrenchment and reorganization scheme of September 1922 He was the best drainage Overseer in the Department and his knowledge and experience of drainage works will be of great use to the Municipality. I would further suggest that the drainage works be kept separate from the other Engineering works of the Municipality if possible, and the Overseer should work under the direct orders of the Chief Officer or the President The work will, however, have to be carried out under the technical supervision of Mr Marker and as Mr Marker will have to inspect the works periodically the Municipality must be prepared to pay for supervision charges These charges can be covered by making a provision under Establishment and Tools and Plant charges at a percentage to be fixed by Government Provision for this as well as the Establishment required to carry out the work should be made in each estimate submitted to Government for sanction-

I have the honour to be,

Sir,

Your most obedient servant,

14.8.27

CHIEF ENGINEER OF MYSORE

Sir,

With reference to your letter No L 3671/II 139-26-13 dated 4th June 1927 forwarding a copy of letter No 11079 dated 16th May 1927 from the Chief Engineer suggesting that the Drainage Project of the Davangere Town unicipality may be carried out in different stages etc., I have the honor to state that the President of the Municipal Council, to whom the matter was referred, reports that Municipal Council are agreeable to execute the work in different stages as suggested by the Chief Engineer and to call for fresh tenders for the 1st stage of the work and that they are also agreeable to take the services of Mr Allappa as overseer for the above project, the pay and allowances to be paid to him and the travelling allowances to Mr Barker, Executive Engineer, for supervising the work being added on to the estimated amount (copy of the resolution is herein enclosed).

The detailed estimates for Rs 28,230/- together with plan etc prepared by the Executive Engineer, Sanitary and Town Planning Division, for the first stage of the work, and recommended by them the Municipal Council are herein enclosed

I request that early sanction of Government may be obtained to the estimates and other proposals of the Municipal Council

I have the honor to be,

Sir,

Your most obedient servant,

D Srinivasa Iyengar

Deputy Commissioner.

Note of Inspection of Davangere Town by H F Marker Esq L.C.E., Etc., Executive Engineer, Sanitary and Town Planning Division

---

Inspected on 5th & 6th April 1927

1 The town was inspected by me at the desire of the Municipality to give them advise in the matter of Drainage and Town Improvements

Three inspections were made morning and afternoon of the 5th and morning of 6th in company with the President of the Municipality (Mr S Abdul Khalak, Revenue Sub Division Officer) and the Members of the Municipal Council

Drainage Works -

2 Government have already sanctioned a project for Drainage for Rs 81 687/- in their Order No L 2048-50/Rl 146-24- dated 14th September 1925 According to the above Government Order the Drairage works are to be executed by the Municipalit themselves through their own agency under the occasional supe vision and guidance of this Department - Government bearing h the cost of the scheme A contribution not exceeding to Rs 10,000/- is promised by the Government every year till the sc is finished

Though the scheme was sanctioned in the year 1925 the wo are not started yet I believe tenders were called for some months ago, but they are not still finally disposed of

It is very high time now that these works are started condition of the town is very insanitary owing to stagnan of sewage all along the main drains c

3 My advice was sought as to how and where to star works I inspected all the outfall ends where the sewage ultimately to be led and treated on land for which agricu land is available

It is advisable to take up the main drain first and start it from the lower end Three such drains as shown i plan accompanying marked I II and III and as shown on th may be taken up at once These are partly open dra ns an

and partly pipe sewers The construction of these main drains will immediately remove a good quantity of sewage that is lying in big pools in the wide Kutcha open drains in the heart of the town A separate estimate is to be prepared for these three main drains and got sanctioned

The scheme sanctioned in the Governmen Order is for administrative sanction Detail estimates are to be prepared at every stage One of such estimates is the estimate for the above 3 main drains

After these main drains are finished, the interior sub mains feeding these main drains are to be taken up for which another set of estimates are to be prepared at a later stage after the above mains are finished

There is another main drain on the other end of the town to drain mostly the Chamaraj Extension On inspection it is found that there is not much sewage and the state of affairs is not so bad as in the heart of the town This area therefore may be taken up last after the town portion is finished.

The whole sewage is led on to open fields where it is to be treated on land for cultivation The whole area is to be divided into plots as explained and irrigated through open channels as is done with water from the channel The land can be leased out and some income made out of it Sewage farms if carefully looked after are always a success as is seen in many places and are a source of revenue to the Municipality

4 As for the proper execution of works, the Municipality will have to obtain a trained suboverseer from P W D having experience in these works otherwise serious mistakes will creep in at the time of execution I believe the Municipality has no levelling instrument for giving levels &c., to the drains A levelling instrument is a great -- necessity as it will be required practically every day during execution of the scheme One may be purchased immediately

FORMATION OF A PARK.-

5. There is no park or recreation ground or a garden to boast of in the whole City - in fact there is not a -- single cheerful or bright spot in the City where one can -- refresh himself nor a good nice Road for a drive It is therefore desirable to create some amenities of life in this City and formation of a park is one of such amenities.

It is proposed to have a park round about the existing elevated water reservoir and the proposal for it is I believe sent up to the Government for sanction The site is east of the High School facing Bangalore Harihar Road and is quite suitable for the park

FORMATION OF A NEW EXTENSION -

6 A new extension is proposed to meet the demands for accommodation of the every day increasing population of the City The extension is proposed in the open fields west of the High School on one side and fronting the -- Bangalore - Harihar Road on the other It is a very suitable site for the extension

A layout plan of this extension will be prepared after a detailed contour survey of the fields is got up and after hearing from the Municipality as to the exact number of sites for Bungalows Cottages and houses &c ,

DEFECTS OF THE OLD EXTENSIONS -

7 In the old Extension, the sites are unfortunately very small in width only 35' and 40' with the result that hardly any space is left from house to house either for privacy or light A good number of sites are still not built upon and it is worth while considering if the width of the sites cannot be increased to 80'

Again want of control over building operation both in the City and in the extension is self - evident from the way in which houses have sprung up skew to the road and the way in which the so called temporary buildings rather huts of thatch and bamboo mats and similar materials are allowed to disfigure important roads such as Goods Shed Road, but worse still, Small as they are, the owners have parcelled out these sites into small bits and on each

bit an ugly little shed has cropped up making drainage and ventilation impossible This can be more rominently seen on Anji— Road and Chowkipet continuation Road One uniform building line is never followed A more efficient and strict control ever buildings is necessary if the town is to grow orderly, neat and pleasant to look at.

In the extension when the new sites are sold, a mutchalika must be taken from the owners of the site that they must keep the building line so many feet away from the road - that so many feet must be kept at either side of the building and that not more than 1/3 of the total area should be built upon and these rules must be strictly adhered to - then only our extensions will look neat and nice

SHIFTING OF THE PRESENT TRAVELLERS' BUNGALOW.-

8 The Travellers' Bungalow is very close about 100' away from the Station and the Railway line This being a busy station, the shunting of goods train and a number of other trains passing to and fro in the day and in the night is a great nuisance to the travellers stopping there The Municipality is desirous of shifting this Travellers' Bungalow to a better site Personally I feel the present situation is not so good as one would desire it to be for a Travellers' Bungalow It is desirable, therefore to shift it to a site in the new proposed extension and facing Bangalore Harihar Road. It will also be along side other public buildings I am informed the present Travellers' Bungalow can fetch a very good price if sold to some merchants as it is very close to the Railway Station just the thing for a merchant If out of the sale money a new Travellers' Bungalow can be put up without any additional expenditure to the Government, I do not think Government can have any objection to its shifting.

A.V. SCHOOL.-

9. The A V School has a big Compound in front, but without a compound wall In one corner facing the Goods Shed Road there is a cattle pond It is desirable to shift it to

te some other place as it is within the compound of the School It is desirable to have a low compound wall round the grounds

MATERNITY HOSPITAL. -

10. Similarly in the compound of Maternity Hospital now under construction there are two private buildings in the corners at each and facing the Goods Shed Road One of these is half constructed and the other is an old building - both must be acquired and removed from this place to keep the - - Maternity Hospital grounds free from private encroachments

A low compound wall round about the grounds of the Hospital is necessary for privacy as well as for neat appearance.

IMPROVEMENT OF GOODS SHED ROAD.

11 On Goods Shed Road opposite the A V School and patch of temporary ugly sheds of bamboo and mud and similar materials have cropped up There are many such patches in the City - they disfigure the road greatly and it is a wonder how they were allowed to be put up by the Municipality It is desirable that the Municipality acquires this whole plot and reallot it again into sites and sell them As the price of land is very high there would not be any loss to the Municipality as they would get back their price with perhaps little more.

ENCROACHMENTS OF MAIN ROADS. -

12 On the Main Bazaar Road (Tambak Road) there are very serious encroachments by the shop keepers as were noticed during the inspection In two cases the big storm water drain has been covered over and houses built on them These encroachments apart from their ugliness are an open challenge to the Municipal authority All these should be removed with a strong hand and the Municipality should assert their authority

RAILWAY STATION YARD. -

13 The yard in frontof the Railway station requires tobe properly laid out for the convenience of the traffic and for the easy movement of passengers coming by trains A plan will be sent up for this

IMPROVEMENTS TO SOME JUNCTIONS

14. It is desirable to improve the following junctions for which plans will be sent up from my Department --

(1) Mandy Road, Taluk Office Road and Goods Shed Road

(2) Junction opposite to V.Pakshappa's Choultry

(3) Bangalore Harihar and Hadadi Road Junction

(4) Juntion of three Roads near Hadadi Toll Gate

(5) Chamraj Road and Tolampet Road Junction near East end of Hospital

THE VEGETABLE MARKET

15 At present the vegetable market is situated at the head of Tambak Road in a triangular plot at the junction of the three important thoroughfares just 2 to 3 furlongs from the Railway Station It is also surrounded by an unsightly heavy compound wall I am of the opinion that this is not a proper place for the vegetable market Municipality is also thinking or removing it to some other site This may be removed to the site where Goods Shed Road and Mandy Road meet and as shown on the spot The heavy compound wall now round about the present vegetable market may be removed and the plot kept free from any building &c , as it forms an important junction of three roads A plan showing the ~~maximum~~ improvement of this junction will be sent up

SITE FOR A MUTTON STALL

16 I was shown the site for a Mutton Stall in Tolampet Road This site is all right, but the Stall is to be enclosed with a compound wall and a proper plan for it may be obtained from my office Some space on either side of the compound wall may be kept open

GROUPING OF PUBLIC OFFICES

17 The Public Offices such as Taluk Office Sub Division Office, Munsiff's Court are scattered in different parts ofthe town The Munsiff's Court is in a rented building in Chamaraj Extension The Taluk Office is just close to the Railway Station It is a Government building In the same compound there is Bonded Depot and also the Octroi Office The Sub Division Offi is in the extension near the elevated Service Reservoir. The Special Magistrate's Court is held in this buildingonly - there is not separate building for it

It is desirable to shift Taluk Office and Munsiff's Court in the site where the Sub Division Office is now There is open ground round about it to accommodate these offices and also the Speical Magistrate's Court By doing this all the Public offices will be grouped in one centre

The Present Taluk Office &c , can be given over to the Municip lity at some upset pricefor their Municipal Office The Municipality have no office of their own, they are having it in the town hall Out of the money from the sale of the Taluk Office to the Municipality new and better building can be built for the Taluk Office I personally think that this arrangement willbe for the mutual good of both the parties the Government and the Municipality

FOOT PATHS AND AVENUE AREAS

18 In some important roads where width permits especially in Chamaraj Extension foot paths and avenue trees are very desirable -- they will add to the better appearance of the town The edge stones for the foot paths can be had from existing V. Shaped drains where such drains are not necessary On some roads these drains are of no use at all They may be remov from there and used advantageously for foot paths curbs

THE MOSQUE

19 The beautiful building of the mosque is almost concealed from view by construction of shops on Islampet Road All good ublic buildings must be seen to advantageand any construction that conceals the view should not be allowed

There is a triangular open space left between the road and the mosque-- this belongs to the Mosque and theyhave put up two temporrry sheds as shops- it is desirable to removethem as it adds to the ugliness of the place and the whole ground enclosed with a compound wall and kept as a garden attached to the mosque

LAY OUT OF SHANTY MAIDAN

20 The Shandy maidan is in Chamaraj Extension facing Anji Road at its southern end The ground is is not laid out at all and is quite bare without a single tree to give shade The ground required to be laid out into plots with shadytrees surrounding them for accommodating different commodities A plot is al o to be reserved for cattle and goats as a bazaar of these is also is held on the Shandy Day A lay out plan will be sent from this office

AREAS FOR GIN ING AND PRESSING -- FACTORIES

21 There are fifteen such factories They have been built upon agricultural lands purchased direct from their owners with the result that there is no Municipal control over them They have sprung up here and thereabout of Anji Roadand at other places

For future at least some areas must be reserved for these factories They may be reserved on southern end of Anji Road by conti uing that road straight and also on Bangalore Harihar road towards Harihar and

It is also necessary by some legislation to prevent the agricultural lands within a certain radius of the town from being sold to these factories without the knowledge and consent of the Municipality so that Municipality may have a control over them It is better that such lands are acquired by the Municipalityand reserved for the factories Opposite the Shandy maidan one such big plot is seen and this is within the hill area and some day some one may put a factory there by purchasing the land direct from the Rayots It is necessary that the municipality acquires this plot and keep it in their own hands

[NG GROUND FOR OOLIES

22 The existence of these so many ginning factories has brought in it wake another serious problem for the Municipality to solve and that is the providing of accomodation for hundreds of coolies that come during the season from outside into the town The Municipality has not tackled this problem in its vast aspect. The result is the e coolies have set up sheds of thatch or bamboo mats costing ith Rs 10/- on any available open spaces both within the town and on its outskirts They have grown up like mush roomsin hundreds We see a cluster of them on open maidan south of shandy nd on the southern end of Anji Road We see there one mass of huts huddled together with their faces in all directions and placed at random in sizes of 8' x 10' or 6' x 12' The unsanitary condition and chaos arising outof this haphazard growth of hundreds of huts can more easily be imagined than described They are a great menace to surrounding people in case of epidemics or fire

These coolies are not permanent residents of the place- most of them come from outside from Bijapur and Poona side for the season and then go away What is wanted for them is a camping ground in close vicinity of the Mills and they all must be compelled to go and live there only These grounds will be laid out with temporary roads with sites measuring 40' x 60' -each site must contain only one hut or shed so as to avoid congestion and other insanitary condition which is noticed now In these camping grounds sanitary conveniences such as water, trench latrines etc , must be provided These trench latrines must be concealed from view for privacy by means of hedges and plants In order to meet the cost of sanitary conveniences and other amenities in these camping grounds a monthly ground rent from as 8 to Re 1 be levied This will bring the Municipality an income of Rs 6 000/- to Rs 10,000/- a year which can be utilized for sanitation and etc , of these camping grounds

Two such camping grounds are proposed in consultation with the Municipality each containing 500 sites. One is in the open field south of Anji Jubilur Road and other on the waste land behind Lingayat Hostel They both will be laid out and plans sent from this office These two camping grounds are at practically two ends of the mill area All these huts that have been in the heart of the City and other places must be removed to these two camping grounds and thereby clearing the town of great danger

NEW VILLAGE

23 The old village of Ansyikund & the southern extremity of the to n is an ugly mass of houses without proper roads, sanitation x . The villagers desire to construct a new village with big sites close to the old village in the waste land in front xxfxxx of it The site shown to me is good and quite suitable for this purpose About 100 sites each measuring 120' x 70' are required The sites are kept particularly big as the villagers want to have a manure pit, a cattle shed, latrine and a tool house in the compound nd not in the house itself as is the case in old villages where practically men and cattle live together

Plan of a model village with 100 house will be sent with typed design for houses suitables for the villagers

AN OVERHEAD BRIDGE TO CROSS THE RAILWAY LINE

25 The town is divided into two portions by the Railway line, the old town practically on the east and the new on the west of the line

There are only two level crossings to cross the line and they are practically at the two extreme ends of the town This causes much inconvenience to the people going from one portion of the town to the other and they have to go round about way The result of this is that many cross the Railway line at the Railway Station and pass through Travellers' Bungalow compound it is not possible to put another level crossing midway between the two and ones as it comes within the shunting limit I would therefore suggest an overhead bridge for the people at the Railway Station to cross the railway line and also to the other side . The Municipality may take up the question in consultation with the Railway authorities This measure will add greatly

greatly to the convenience of the public

A PROGRAMME OF TOWN IMPROVEMENTS TO BE PREPARED.

25 The population of the town is between 17 to 18 thousand and the income of the Municipality nearly Rs75,000/- and they have a surplus of about Rs 90,000/- It is a busy growing city owing to cotton industry and requires extension The large surplus which the Municipality possess can very advantageously be used for improving the sanitation of the town which is very very poor and for creating some amenities of life for the people Many of the suggestions put forward in the above notes, if carried out will go a great way in improving the town both from the aesthetic and hygienic point of view

I would suggest the Municipality to chalk out a programme of town improvements in the order of urgency and spread (embrace) out the improvements to be finished say in a period of 5 to 10 years as their resources permit A small Town Improvement Committee to watch over the programme and carry out the works would be very desirable

My department(Sanitary and Town Planning Division) would be ever ready render all possible help by way of suggestions, advice &c to the Municipality in matters relating to town improvements.

OFFICE OF THE DEWAN OF MYSORE
Date of Recn 1 ___ ___
Petn. Acy. No 2237

Respected Sir,

I the undersigned, beg to bring the following few lines to your honour's kind consideration and requests to pass favourable orders

The Drainage works of Davangere was sanctioned by Government for Rs. 80000/- and tenders were called by the Municipality accordingly, fixing security deposit of - - Rs. 2000/- for the same

For which three tenders were received one Mr H Subbarao, the late Mysore Bank Commission agent

Messrs Gaviappa and Sons, Government approved Contractor and of mine

In comparing the three tenders mine was the - lowest, that 4000/- less than the last tender of Mr H Subbarao, & Messrs Gaviappa and Sons and the difference i 000/- more than mine

But the members of the Council recommended - to Mr H Subbarao without considering of mine and - Messrs. Gaviappa and Sons even though the total amount - was 4000/- less than the sanctioned amount. More over, it is not possible to put all the underhand dealings - between Councillors and President in black and white and it can be explained in person if I am permitted to do so.

If the work is entrusted to the P W D Department there will be savings not less than 20000/- wherein the Municipality or the members cannot wag their tail - before the Government

Solicits early consideration in the matter

I beg to remain,
Sir
Your most obedient Servant
